Professional Summary

- Versatile Data Science and Information Management professional with 7+ years of demonstrated experience leading enterprise-level analytics, data engineering, and database modernizations across federal contracting, defense, and non-profit sectors.
- Proven track record acting in a project manager capacity, leading cross-functional teams of over 14+ members to deliver scalable data solutions, automated pipelines, and cloud-based analytics tools.
- Expert at bridging technical execution with senior leadership strategy to drive data-driven decision-making and organizational transformation.

Experience

TECHNOMICS, INC. | Senior Data Analyst | Aug 2021 -- Present

Project Management and Leadership

- Led data management, data science, and analytics projects to maximize enterprise-level data solutions for federal, defense, and international clients.
- Managed cross-functional development teams ranging with up to 14+ members leveraging Agile and Kanban frameworks.
- Directed workloads, established sprint agendas, conducted code reviews, and provided technical mentorship to expand team capabilities.

Data Management, Data Science, Advanced Analytics

- Championed multiple, complex database migration and workflows from legacy MS Access setups to modern frameworks leveraging DuckDB and R tools.
- Reviewed and optimized R queries, validated SQL conversions, and ensured data pipelines conformed strictly to data modeling requirements.
- Designed and implemented a prioritization model for streamlining technical manual updates, reducing process subjectivity and optimizing resource allocation via automated Palantir Foundry, Python, and Power BI data pipelines.
- Replaced manual, MS Excel-heavy reporting workflows with automated, R-based data pipelines.
- Leveraged Git/GitLab version control to refine data extraction and implement dynamic formatting, increasing delivery efficiency and reducing manhours.
- Engineered interactive, high-visibility BI tools to analyze cost growth and engineering change proposals trends, translating granular technical data into actionable risk metrics for executive stakeholders.

Enterprise-Scale Training Delivery

- Supported development and delivery of organization-wide Data and Analytics Certification program.
- Upgraded data literacy by developing training for approximately 1,200 personnel (15

KCIC, LLC | Senior Data Analyst | Mar 2019 -- Aug 2021

Database Engineering, Analytics and Reporting, Data Quality Control

- Provided database and information management solutions, supporting corporate claims administration and analysis.
- Authored and tuned complex MS SQL views, stored procedures, and indexes, significantly improving data retrieval speeds and front-end usability.
- Developed SQL queries and MS Excel pivot tables to analyze massive tranches of claims data, generating analysis for key industry reports.
- Designed rigorous data validation routines to audit legacy claims data, supporting document ingestion volumes under strict 48-hour deadlines.
- Designed and executed firm-wide data analysis training programs that standardized database ingestion, reporting protocols, and analytics adoption across analyst and consultant teams.

Education

- Professional Certificate in Data Science – Montgomery College (2019–2020)
- B.A. Economics, Government and Politics – University of Maryland (2013–2017)

Core Competencies

Leadership: Agile, Kanban, Project Management, Stakeholder Engagement

Data Science: Python, R, Statistical Modeling, Visualization

Data Engineering: SQL, ETL/ELT, DuckDB, MongoDB

Tools: Power BI, Power Apps, Power Automate, Git, Excel, Palantir Foundry
